

DATA MINING NINJANEER

📍 Lviv, Ukraine **remote**

Are you passionate about data mining and entrepreneurship?

Great! Join [StartUs Insights](#), an international data science company analyzing startups, scale-ups and their technologies to deliver actionable innovation intelligence to industry leaders all over the globe.

We are looking for a passionate and curious Data Mining Ninjaneer who supports us in mining even more interesting data on startups and their technologies. Apply now!

IF YOU ENJOY:

- mining data and identifying innovative ways to mine data
 - designing, building and managing data mining systems
 - applying data wrangling to turn raw data into manageable information
- ...you are in the right place!**

YOU:

- have a passion for startups, innovation and technology
- have already built several crawlers or spiders and have fun doing it
- have experience with scraping frameworks and software solutions
- know your way around parsing to find the needle in the haystack
- are proficient in Python (others languages beneficial)
- have working knowledge in English

YOUR MISSION:

- extract and sort information on global startups, innovation and technology
- design, build and operate data mining and data wrangling systems
- maintain and improve existing systems

WHAT YOU GET:

- work in an environment where your decisions shape the future of StartUs Insights
- become part of an international team you'll enjoy working with
- work with our team in Lviv and enjoy regular office exchanges with the HQ in Vienna (AT)
- enjoy flexible working hours
- benefit from a flexible workload: starting at 15h weekly up to full time (full-time preferred)
- starting at 500€ for a full-time position with the possibility for overpay based on experience and track record
